

GWE Sealants Well Construction/Geothermal Systems

Product name	Dämmer	Troptogel B	Troptogel C	Füllbinder L-HS	GeoTherm Light	GeoTherm 2.0	ThermoSeal M
	Well Construction			Geothermal Systems			
							
Product type	Dry mortar	Ready-made mixture	Ready-made mixture	Dry mortar	Dry mortar	Ready-made mixture	Clay pellets
						Thermally enhanced	Marked
Application	Sealing material for the backfill of underground hollows and cavities	Sealing material for the backfill of water wells and ground water monitoring wells	Marked sealing material for the backfill of water wells and ground water monitoring wells with gamma ray detectability	Sealing grout with adequate thermal conductivity	Sealing grout with adequate thermal conductivity and freeze/thaw resistance	Sealing grout with high thermal conductivity and freeze/thaw resistance	Swellable clay pellets with improved thermal conductivity for the annular backfill of geothermal probes
Benefit	Price/Performance	Impermeability	Impermeability/Yield	Price/Performance	Price/Performance	High thermal conductivity	Detectability
		Yield	Detectability		Freeze/Thaw resistance	Freeze/Thaw resistance	Freeze/Thaw resistance
